NEW Thompson Retractor Features

Faster, Lighter, More Efficient

Thompson's Elite Rail Clamp, unilateral crossbar, and retractor handles have all been updated for improved performance and ease of use.

Thompson is dedicated to providing the most forward thinking, proven, and high quality features.

Elite III Rail Clamps

Sterile, quick tightening knob locks rail clamp to bed securely in half the time, when compared with the Elite II Rail Clamp, while lightweight base design reduces overall weight by 1 pound.

Quick Angle Handles

Versatile, low-profile positioning of blades helps maintain a low-profile operating field and achieve better exposure. Blades can be toed in or out 45° with a T-Handle.

Improved Cam Joints

Now easier to lock and unlock, Cam II Clip-on Handles have been upgraded to include comfort "pinch" joints for easier removal from the frame.

NOTICE:

Elite II Rail Clamps and Angling Handles still available, but may require a longer lead time. Please call for more information.
